

Appl. No. 10/613,512
Amdt. dated March 13, 2006
Reply to Office Action of December 12, 2005

PATENT

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (original) A computer interface system comprising:
a hub connected to said computer and configured to communicate wirelessly with
at least three peripheral devices;
a wireless mouse for wirelessly communicating with said hub;
a wireless keyboard for wirelessly communicating with said hub, said wireless
keyboard having an alphanumeric keyboard but no separate number pad; and
a wireless numeric keyboard for wirelessly communicating with said hub, said
wireless numeric keyboard including a number pad and a display.
2. (previously presented) The system of claim 1 wherein said wireless numeric
keyboard is configured with two modes of operation, a first mode as a number pad and a second
mode as a calculator.
3. (previously presented) The system of claim 1 wherein said wireless numeric
keyboard is configured to provide a navigating function.
4. (previously presented) The system of claim 1 further comprising a media
button on one of said wireless keyboard and said wireless numeric keyboard, said media button
being configured to launch a media application.
5. (previously presented) The system of claim 4 wherein said media application
comprises one of an application for playing music, an application for displaying a video and an
application for displaying still pictures.

PATENT

6. (previously presented) The system of claim 1 wherein said wireless mouse, wireless keyboard and wireless numeric keyboard all communicate using Bluetooth™ technology with said hub.

7. (previously presented) The system of claim 1 wherein said hub is connected to a USB port of said computer.

8. (previously presented) The system of claim 1 wherein said wireless keyboard and wireless numeric keyboard each include media buttons for performing the same functions.

9. (previously presented) The system of claim 8 wherein said media buttons include a volume up button, a volume down button and a mute button.

10. (previously presented) A computer interface system comprising:
a hub connected to said computer via a USB port and configured to communicate wirelessly using Bluetooth™ technology with at least three peripheral devices;
a wireless mouse for wirelessly communicating with said hub;
a wireless keyboard for wirelessly communicating with said hub, said wireless keyboard having an alphanumeric keyboard but no separate number pad;
a wireless numeric keyboard for wirelessly communicating with said hub, said wireless numeric keyboard including a number pad and a display, wherein said wireless numeric keyboard is configured to provide a navigating function; and
a media button on one of said wireless keyboard and said wireless numeric keyboard, said media button being configured to launch a media application, said media application comprises one of an application for playing music, an application for displaying a video and an application for displaying still pictures.
